## engine

Each aircraft has a different type of engine. The engines move the aircraft through the air at different speeds. A passenger jet  flies through the air at 550 miles per hour. A smaller private aircraft  flies through the air at 410 miles per hour. A fighter jet  flies through the air at 1,500 miles per hour.

The chart below shows the speed at which each aircraft flies. Use the graph below to complete the activity on the next page.
